To Whom It May Concern:

I am very pleased to recommend Charles (Charlie) Ross for acceptance into Florida Poly.

I had the pleasure of working with Charlie during last school year as his AICE Mathematics teacher. This year he is a student in my AP Calculus AB course. Charlie is very committed to learning and displays excellent work ethics.

Charlie works diligently to master concepts taught in class. When he has difficulty understanding a topic, he will discuss the work with his peers or he will ask for my assistance. More often than not, Charlie is the one helping his classmates with their coursework – he is consistently patient and thorough when helping others. Charlie has remained successful throughout both courses due to his efforts.

Charlie is an excellent student, and it has been a pleasure to work with him during the past two school years. He has earned the respect of his teachers and classmates, not only for his mathematical acumen, but also for his ability to help his classmates understand the coursework. Charlie is a truly deserving candidate and I strongly recommend that you consider him for this honor.

Sincerely,

Kari McMillan
Mathematics Department Chair
